GUITAR SCHOOL

DCPL09 - FIRST LEVEL OF THE ACADEMIC DEGREE COURSE IN GUITAR

Program learning outcomes	<p>At the end of the First Level of the Academic Degree in Guitar, students acquire the techniques and the specific skills that allow them to concretely realize their artistic idea. For this purpose, particular emphasis is given to the study of the most representative instrument repertoire - including the ensemble - and its related performance practice, also with the aim of developing the student's ability to interact within differently composed musical groups. These goals are also achieved by promoting the development of the memory and auditory perceptual abilities and by acquiring specific knowledge relating to the music organizational, compositional and analytical models and their interaction.</p> <p>A particular focus is dedicated to acquiring appropriate postural and emotional control techniques. At the end of the three-year period, students own an in-depth knowledge of the stylistic, historical, aesthetic and general aspects related to their specific specialization. In addition, with reference to the features of each course, students acquire appropriate improvisation techniques. Learning outcomes consist also in developing specific skills in music informatics and learning a second EU language.</p>
Professional placement	<p>The course offers students employment opportunities in the following areas:</p> <ul style="list-style-type: none">- Solo instrumentalist- Instrumentalist in chamber ensembles- Instrumentalist in orchestral chamber ensembles
